Products

- Diameters up to 3" (75mm)
- Con rod bolts
- Main bearing bolts
- Head bolts
- Flywheel bolts
- Pins and large studs
- Other applications
 - High strength
 - Fatigue resistant
 - High / low temperature

Operations

- Heading
- Hot forging
- Heat treating
- Straightening
- Thread and knurl rolling
- Fillet rolling
- Grinding
- 3 Axis CNC turning center
- Prototyping
- Secondary machining

Special Materials

- Carbon and Alloy Steel
- 300 & 400 Series Stainless
- High Temp including: B16 and A286
- Nickel based including: Inconel and Nomonic Alloys
- Other non-ferrous materials can be quoted
- Performance based coatings

Industries

- Diesel engines
 - On-highway
 - Off-highway
- Power generation
- Locomotive
- Agricultural equipment
- Military
- Marine power
- Oil and gas
- Construction

Manufacturing Capabilities

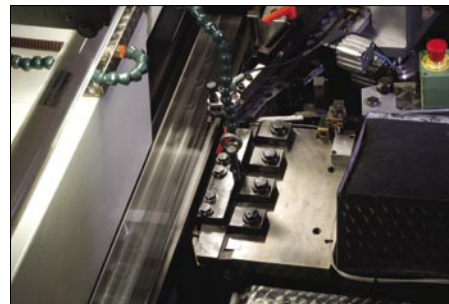

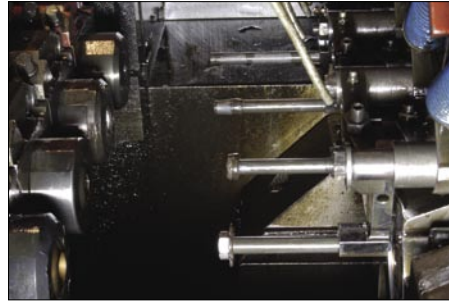

Materials

Alloy steel, stainless steel, carbon steel, non-ferrous materials, high and low temperature applications.

Surface Treatments

Hexavalent chrome free, thermal black oxide, specialized phosphate and oil finishes, zinc plating, shot-peening, and customer special requests.
